- Access to partnership resource documents and support
- Access to audio/video conference platform to support communication

ENGAGEMENT ACTIVITIES

This list is comprised of activities that are common among successful partnerships. This is not meant to be restrictive and if the partnership takes on another kind of engagement activity, please share with us!

1. Education/training support
2. Advocacy/awareness activities
3. Employee payroll deduction
4. Fundraising events
5. Involve additional collaborations (i.e. hospitals, universities, churches, etc.) that contribute to the strength of the overall partnership – both the relationship and the impact.

Growth in cultural awareness and appreciation is a result of the exchange visits. These visits are crucial to the success of partnerships which is why they are defined separately in the requirement list.

Official quarterly communication is required but flourishing partnerships often have communication in the form of email or phone calls at least monthly if not more often!
